Programming in Python: Online vs. Offline

PYTHON ONLINE: Google Colab

- Easy to start immediately to code
- Files stored directly on the Cloud
- Easier to share code
- Speed depends on your internet connection

Programming in Python: Online vs. Offline

PYTHON ONLINE: Google Colab

- Easy to start immediately to code
- Files stored directly on the Cloud
- Easier to share code
- Speed depends on your internet connection

PYTHON OFFLINE: Anaconda

- You do not need an internet connection
- You must install a number of software packages
- Speed depends on your computer
- *(On the long run, it is the way to go)*
