

Curriculum vitae – Marco Veneroni

Dipartimento di Matematica F. Casorati, Università degli studi di Pavia
Via Ferrata 5, 27100 Pavia, Italy

Phone: +39.0382.985656, Fax: +39.0382.985602

email: marco.veneroni@unipv.it

homepage: <http://www-dimat.unipv.it/~veneroni/>

EDUCATION

2013 **Italian National Scientific Habilitation**

Qualification to associate professor

Sector A1/03 (Mathematical analysis, probability and statistics)

2007 **Ph.D. in Mathematics and Statistics**

Department of Mathematics “F. Casorati”, University of Pavia, Italy

Thesis: “Mathematical models for the cardiac electric field”

Supervisor: Prof. G. Savaré

2003 **Degree in Mathematics**

Department of Mathematics “F. Casorati”, University of Pavia, Italy

(Grade: 110/110 cum laude)

Thesis: “The Hodgkin-Huxley model for the propagation of the cardiac electric field”.

Supervisor: Prof. G. Savaré

EMPLOYMENT

09/2016 – present **Associate professor**

Department of Mathematics “F. Casorati”, University of Pavia, Italy

09/2011 – 08/2016 **Assistant professor**

Department of Mathematics “F. Casorati”, University of Pavia, Italy

01/2011 – 08/2011 **Post-doctoral fellow**

Department of Mathematics and Statistics, McGill University, Montreal, Canada

Supervisor: Prof. Rustum Choksi

01/2009 – 12/2010 **Post-doctoral fellow**

Department of Mathematics, Dortmund Technical University, Dortmund, Germany

Supervisor: Prof. dr. Ben Schweizer

11/2006 – 12/2008 **Post-doctoral fellow**

Department of Mathematics and Computer Science, Eindhoven University of Technology,
Eindhoven, the Netherlands

Supervisor: Prof. dr. Mark A. Peletier

11/2003 – 10/2006 **Ph.D. candidate in Mathematics and Statistics**

Department of Mathematics “F. Casorati”, University of Pavia, Italy

Supervisor: Prof. Giuseppe Savaré

PUBLICATIONS

PUBLISHED PAPERS and PROCEEDINGS

-

AWARDS

- 2011 SIAM Review's SIGEST award for the research article:
M. A. Peletier, G. Savaré, M. Veneroni. From diffusion to reaction via Gamma-convergence. *SIAM Journal on Mathematical Analysis*, 42 (2010), no. 4, 1805–1825.
 - 2004 “Prof. Vittorio Emanuele Galafassi” prize for the best degree thesis in Mathematics at the University of Pavia, Italy.
-

GRANTS

Individual grants

- 2014 Renewal of the “Rita Levi Montalcini” program for young researchers - see below
Funding institution: the Italian Ministry for University and Research
Duration: three years
- 2010 “Rita Levi Montalcini” program for young researchers
Funding institution: the Italian Ministry for University and Research
Duration: three years, renewable
- 2007 Applied research grant “Ingenio”
Funding institution: Regione Lombardia, Italy
Duration: one year
- 2003 Scholarship for the Ph.D. in Mathematics and Statistics at the University of Pavia, Italy
Funding institution: the Italian Ministry for University and Research
Duration: three years.

Group grants

- 2021 Member of scientific project
Title: “Optimal transport and shape optimization in additive manufacturing and machine learning”
Funding institution: the Italian Ministry for University and Research
Program: Scientific Research Programs of Relevant National Interest (PRIN)
Duration: three years
Scientific coordinator: Pasquale Ciarletta (Politecnico di Milano)
- 2017 Scientific project coordinator
Title: “Dynamics of defects on curved surfaces”
Funding institution: INDAM (National Institute of High Mathematics - Italy)
Duration: one year
Size of research team: four researchers
- 2016 Member of scientific project
Title: “Well-posedness and asymptotic analysis for models of liquid crystals and polymers”
Funding institution: INDAM (National Institute of High Mathematics - Italy)
Duration: one year
Size of research team: six researchers (Scientific coordinator: Cecilia Cavaterra (University of Milano))
- 2014 Scientific project coordinator
Title: “Surface energies: Analysis and applications to liquid crystals”
Funding institution: INDAM (National Institute of High Mathematics - Italy)
Duration: one year
Size of research team: three researchers
- 2012 Member of scientific project
Title: “Mathematical analysis of fluxes of liquid crystals”
Funding institution: INDAM (National Institute of High Mathematics - Italy)
Duration: one year
Size of research team: five researchers (Scientific coordinator: Antonio Segatti (University of Pavia))
- 2011 Member of scientific project
Title: “Calculus of Variations”
Funding institution: the Italian Ministry for University and Research
Program: Scientific Research Programs of Relevant National Interest (PRIN)
Duration: three years
Size of the local cluster: 20 researchers
Scientific coordinators: Gianni Dal Maso (SISSA Trieste) and Giuseppe Savaré (University of Pavia)
-

RESEARCH VISITS

- 01/2016 –04/2016 Department of Mathematics and Statistics, McGill University, Montreal, Canada
(Invited by Prof. Rustum Choksi)
- 04/2014 SISSA – International School for Advanced Studies, Trieste, Italy
(Invited by Dr. Luca Heltai)
- 03/2013 –09/2013 Department of Mathematics and Statistics, McGill University, Montreal, Canada
(Invited by Prof. Rustum Choksi)
- 01/2013 Institute for Applied Mathematics, Bonn, Germany
(Invited by Prof. dr. Juan Velázquez)
- 09/2011 –02/2012 Department of Mathematics and Statistics, McGill University, Montreal, Canada
(Invited by Prof. Rustum Choksi)
-

TEACHING EXPERIENCE

University of Pavia, Italy

- Mathematics, 1st year Bachelor of Biological Sciences - since 2017.
- Mathematical analysis 2, 1st year Bachelor of Biomedical, Electronic, and Computing systems Engineering - since 2012.
- Evolution equations, 1st and 2nd year Masters of Mathematics - 2016 and 2018.
- Mathematical analysis, 1st year Bachelor of Civil Engineering - 2016.
- Mathematical analysis 1, 1st year Bachelor of Biomedical, Electronic, and Computing systems Engineering - 2015.
- Mathematical analysis 2, 1st year Bachelor in Building Engineering and Architecture - 2013 and 2015.
- Mathematical analysis 3, 1st year Masters of Civil Engineering - 2013.
- Mathematical methods for Engineering, 2nd year Bachelor of Biomedical and Computing systems Engineering - 2012.
- Advanced mathematical methods for Engineering, 1st year Masters of Electrical Engineering - 2012.

McGill University – Montreal, Canada

- 2011 – Co-lecturer: Seminar on Operator theory
Masters, PhD, Postdoctoral students
- Lecturer: Applied linear algebra (MATH-270)
2nd year Bachelor of Computer, Electrical, Software Engineering

Technical University Dortmund, Germany

- 2010–11 – Lecturer: An introduction to homogenization theory
1st and 2nd year Masters of Mathematics
- Co-lecturer: Seminar on Introduction to stochastic homogenization
Masters, PhD, Postdoctoral students
- Co-lecturer: Seminar on Stochastic partial differential equations
Masters, PhD, Postdoctoral students
- 2009–10 – Lecturer: Advanced Engineering Mathematics
1st year Masters of Automation and Robotics
- Lecturer: Weak convergence methods in calculus of variations and PDEs
Masters and PhD students

Eindhoven University of Technology, The Netherlands

- 2007–08 – Co-Lecturer: Seminar on Partial Differential Equations
PhD, Postdoctoral students
- Co-Lecturer: Seminar on An introduction to Gamma-convergence
Masters, PhD, Postdoctoral students

STUDENT SUPERVISION

- 2021 · **Gennaro Auricchio**, PhD in Mathematics, Università degli Studi di Pavia.
Title of the thesis: “Efficient methods for Discrete Optimal Transport”
Co-supervisor with prof. S. Gualandi, Università degli Studi di Pavia.
- **Anderson Melchor Hernandez**, PhD in Mathematics, Università degli Studi di Pavia.
Title of the thesis: “ On convergence to gaussian measures for classical and quantum Markov processes.” Co-supervisor: prof. ssa R. Carbone, Università degli Studi di Pavia.
- 2020 · **Francesca Bagnalasta**, Bachelor’s in Mathematics, Università degli Studi di Pavia.
Title of the thesis: “Teoria dei sistemi dinamici singolarmente perturbati ed applicazioni in elettrofisiologia”.
- **Emanuele Carnevale Baraglia**, Bachelor’s in Bioengineering, Università degli Studi di Pavia.
Title of the thesis: “ Un modello matematico per la precessione di fase dell’attività delle cellule di posizione ippocampali”. Co-supervisor: prof. G. R. Biella, Università degli Studi di Pavia.
- **Sofia M. Cecchini**, Bachelor’s in Bioengineering, Università degli Studi di Pavia.
Title of the thesis: “Un algoritmo di trasporto ottimo per la registrazione di immagini”.
- **Rachele Mascolo**, Bachelor’s in Mathematics, Università degli Studi di Pavia.
Title of the thesis: “Reti neurali feed-forward: analisi e applicazione per il riconoscimento di cifre manoscritte”.
- **Erick Turricelli**, Bachelor’s at IUSS, Dept. of Science, Technology, and Society.
Title of the thesis: “Design of an autonomous system for a driverless car”.
- 2017 · **Elisa C. Pavarino**, Bachelor’s in Bioengineering, Università degli Studi di Pavia.
Title of the thesis: “La rappresentazione dello Spazio nel Cervello: modelli computazionali per le grid cells”. Co-supervisor with prof. G. R. Biella, Università degli Studi di Pavia.
- 2016 · **Stefano Marini**, Master’s in Mathematics, Università Cattolica del Sacro Cuore, Brescia.
Title of the thesis: “Stochastic homogenization of maximal monotone relations and applications”
Co-supervisor with prof. L. Lussardi, Università Cattolica del Sacro Cuore, Brescia.

- 2012 · **Michael Snarski**, (report for a Scholarship funded by the Natural Sciences and Engineering Research Council of Canada), McGill University, Montreal.
 Title of the report: “A survey of genus 1 minimizers to the constrained Willmore and Helfrich functionals for biological membranes”. Informal supervision with prof. R. Choksi and prof. D. Jakobson, McGill University, Montreal.
- 2011 · **Zhe Chen**, Bachelor’s in Mathematics (report for an Undergraduate Summer Scholarship funded by Institut des Sciences Mathématiques - Montréal), McGill University, Montreal.
 Title of the Honours independent study: “Convex analysis and nonlinear optimization”.
 Co-supervisor with prof. G. Tsogtgerel, McGill University, Montreal.
-

SCIENTIFIC PRESENTATIONS

- “*Stochastic homogenization of maximal monotone relations and applications*”, invited seminar, University of Trento, April 5, 2017
- “*Stochastic homogenization of maximal monotone relations*”, 16th GAMM-Seminar on Microstructures, Dortmund, January 21, 2017
- “*Analysis of a Variational Model for Nematic Shells*”, CIME course on Mathematical Thermodynamics of complex fluids, Cetraro, July 2, 2015
- “*On minimizers of the bending energy for two-phase biomembranes*”, SIAM Conference on Life Sciences, Charlotte (NC), August 6, 2014
- “*Some results on a variational model for nematic shells-Part B*”, 10th AIMS Conference on Dynamical Systems, Differential Equations and Applications, Madrid, July 8, 2014
- “*On minimizers of the bending energy for two-phase biomembranes*”, 9th European Conference on Mathematical and Theoretical Biology, Göteborg, June 15, 2014
- “*Analysis of a variational model for liquid crystal shells*”, 18th European Conference on Mathematics for Industry, Taormina, June 11, 2014
- “*Equilibrium configurations of nematic liquid crystals on surfaces*”, invited seminar, SISSA – Trieste, April 1, 2014
- “*Equilibrium configurations of nematic liquid crystals on surfaces*”, two days Workshop on LC-flows, Pavia, March 24-25, 2014
- “*On minimizers of Helfrich energy for two-phase biomembranes*”, invited seminar, Technical University Dortmund, March 05, 2013
- “*On minimizers of Helfrich energy for two-phase biomembranes*”, workshop on Variational Models and Methods for Evolution, Levico Terme, September 10-12, 2012
- “*On minimizers of the bending energy of two-phase biomembranes*”, invited seminar, McGill University, Montreal, August 31, 2012
- “*On minimizers of Helfrich energy for two-phase biomembranes*”, workshop on Geometry of Interfaces and Capillarity, Granada, June 25-27, 2012
- “*On minimizers of Helfrich energy for two-phase biomembranes*”, 12th International Conference on Free Boundary Problems, Frauenchiemsee, June 11-15, 2012

- “*On minimizers of the doubly constrained Helfrich functional*”, workshop on Scale Transitions in Chemistry and Biology, Edinburgh, June 4-8, 2012
- “*Global minimizers for axisymmetric multiphase membranes*”, invited seminar, Università Cattolica di Brescia, May 9, 2012
- “*On minimizers of the doubly-constrained Helfrich functional*,” SIAM Conference on Analysis of Partial Differential Equations, San Diego, November 14-17, 2011
- “*From diffusion to reaction via Gamma-convergence*,” SIAM Conference on Analysis of Partial Differential Equations, San Diego, November 14-17 2011
- “*Existence of minimizers for a constrained functional on curvatures*,” invited seminar, CRM/McGill, Montreal, October 31, 2011
- “*Periodic homogenization for a model of plasticity*,” workshop on “*Macroscopic Modeling of Materials with Fine Structure*,” Carnegie Mellon University, Pittsburgh, May 26-28, 2011
- “*Periodic homogenization for a model of plasticity*,” BIRS workshop “*Rate-independent systems: Modeling, Analysis, and Computations*,” Banff, August 29 – September 3, 2010
- “*Homogenization of Prandtl-Reuss plasticity equations*,” 81st Annual meeting of the International Association of Applied Mathematics and Mechanics (GAMM), Karlsruhe, March 22-26, 2010
- “*Homogenization of Prandtl-Reuss plasticity equations*,” Eindhoven-Dortmund meeting, March 15-16, 2010
- “*Homogenization for a problem of elasto-plasticity*,” invited seminar, University of Trento, March 2, 2010
- “*Homogenization of plasticity equations in arbitrary dimension*,” invited seminar, Technische Universität Darmstadt, December 16, 2009
- “*Variational methods for pattern formation in diblock copolymers*,” “*CASA day*,” Eindhoven, November 13, 2008
- “*Variational methods for pattern formation in diblock copolymers*,” workshop “*PDE approximations in fast reaction - slow diffusion scenarios*” Leiden, November 10-14, 2008
- “*Variational methods for pattern formation in diblock copolymers*,” invited seminar, Technische Universität Dortmund, November 6, 2008
- “*Variational methods for pattern formation in diblock copolymers*,” Jahrestagung der Deutsche Mathematiker Vereinigung, Erlangen, September 2008
- “*Variational methods for pattern formation in diblock copolymers*,” invited seminar, Centre for Wiskunde & Informatica, Amsterdam, September 9, 2008
- “*Variational methods for pattern formation in polymers*,” NDNS+ workshop “*Partial Differential Equations in Applied Analysis*,” Apeldoorn, May 22-23, 2008
- “*A Variational model for diblock copolymers*,” CIM/UC Summer School “*Topics in Nonlinear PDES*,” Coimbra, July 22-27, 2007
- “*Patterns formation in diblock copolymers*,” “*CASA day*,” Eindhoven, May 9, 2007
- “*Inverse eigenvalue problems*,” “*CASA Seminar*,” Eindhoven, April 4, 2007
- “*Mathematical models for the cardiac electric field*,” European Mathematical Society summer school “*Mathematics in Molecular Cell Biology*,” Linz, September 11-23, 2006

- “*Reaction diffusion systems modeling the cardiac electric field,*” workshop “Modellizzazione matematica ed analisi dei problemi a frontiera libera”, Montecatini Terme, September 29–30, 2005
 - “*Equazioni di Reazione-Diffusione per l’elettrocardiologia,*” workshop INDAM “Integrazione di sistemi complessi in biomedicina: modelli, simulazioni, rappresentazioni”, Bergamo, November 22–24, 2004
